

Microbial Single Cell Genomics Project Request Form

The Microbial Single Cell Genomics Facility is part of the SciLife laboratories functional genomics platform and is located in corridor B9:2 at the Biomedical Centre of Uppsala University. If you want to use the services of the facility as described on the website, please fill out the form and send this by e-mail to the platform director, Prof. Stefan Bertilsson (stebe@ebc.uu.se). We will then contact you and discuss the project.

Customer information

Name of PI

Affiliation

Email address

Phone number

URL

Name and email address of contact person if other than PI

Funding source for proposed project

Project information

Brief project description (max 200 words)

Sample information

Sample type

Cell size and shape

Cell abundance

Number and volumes of samples and replicates

Sample preservation method

Service request

Sorting

FACS

C1

Amplification

MDA

PCR screening

16S rRNA

Bacterial

Archaeal

Universal

Other

If other, please specify

Additional information

Does the sample contain possible environmental or health hazards?

Biosafety level required?

Yes

No

Which?

Method of inactivation and decontamination

Further comments

Name, place and date
